

## your future, your script

Script Education are a specialist provider in professional development, focusing on delivering high quality training in technical and non-technical areas for professionals in the UK.

## A bit about us...

At Script Education, we pride ourselves in being a team of professional development experts specialising in the delivery of technical and non-technical workshops for individuals and organisations in the UK.

The corporate landscape is ever-evolving and innovations brought forward by Blockchain technology and Machine Learning (Artificial Intelligence) will only accelerate change even further.

Through customised training workshops, we believe that organisations, as well as individuals, can prepare themselves on how to use such innovations to their advantage. Today's complicated, global economy requires a skilled workforce that can learn and implement such technologies to fuel the success of an organisation.

With our programmes, our mission is to convert technical, complex concepts relating to Artificial Intelligence and Blockchain into readily accessible material for teams and the everyday individual. Whether you are a seasoned programmer, or a non-technical leader, we have workshops available for all levels.

All of our courses have a well-established curriculum that has been carefully designed by market leaders and academics within the field to ensure the most current and up to day topics are being taught.

With extensive experience in Global Education, Training and Technology, we are committed to delivering high quality content via a variety of delivery methods. Whether you are looking to upskill yourself, or your team, please contact us for more information.
