

Technical Workshops for Professionals

WHO WE ARE

At Script Education, we pride ourselves in being a team of professional development experts specialising in the delivery of technical and non-technical workshops for individuals and organisations in the UK. We specialise in emerging technologies.

OUR TEAM

All of our courses have a well-established curriculum that has been carefully designed by market leaders and academics within the field to ensure the most current and up to day topics are being taught.

With extensive experience in Global Education, Training and Technology, we are committed to delivering high quality content.

WHAT WE DO

Through customised training workshops, we believe that organisations, as well as individuals, can prepare themselves on how to use new technological innovations to their advantage. Today's complicated, global economy requires a skilled workforce that can learn and implement such technologies to fuel the success of an organisation.

With our programmes, our mission is to convert technical, complex concepts relating to Artificial Intelligence and Blockchain into readily accessible material for teams and the everyday individual. We carefully select our curriculum design team and trainers to ensure that they have the highest level of industry currency. Making sure you are learning the most current skills.
